Select this option to from folder hierarchy			

**Step Two**: Choose the Outlook format and provide a place for saving the email data.

The software gives you the choice to split the PST file if you choose the Save as PST option. Several Split options can be used to divide a large PST file:

Do not Split	If you wish to produce a single PST file, choose this option.
Split file after 1GB	To split the PST into equal 1 GB files, use this option.
	For instance, if you choose this option for a PST file that is 3.5 GB in size, you will receive four PST files: three of them will be 1 GB apiece, and the fourth will be 0.5 GB.
Split file after 1.5GB	To split the PST into equal 1.5 GB files, use this option.
Split file after 2GB	To split the PST into equal 2 GB files, use this option.

Split file after 2.5GB	To split the PST into equal 2.5 GB files, use this option.
Split file after 3GB	To split the PST into equal 3GB files, use this option.
Split file after 3.5GB	To split the PST into equal 3.5 GB files, use this option.

Additionally, there are options for prefixing the Store Name and adding the chosen folder to Outlook's IPM SUBTREE. The recovered Store name will display in Outlook with the given prefix if you enable the "Attach Prefix to Store Name" option and provide the necessary prefix in the Store name prefix text box. The folder hierarchy in Outlook will begin with IPM SUBTREE if the "Hierarchy starts from IPM SUBTREE in Outlook" option is enabled.

**Step Three:** To save the data in Outlook PST format, click OK after choosing the saving format, location, and necessary parameters. Following the completion of the saving process, the following notice and a link to the PST file's storage location will be shown:
